DATE OF INFORMATION

THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES, WITHIN THE MEANING OF TITLE 18, SECTIONS 793 AND 794, OF THE U.S. CODE, AS AMENDED. ITS TRANSMISSION OR REVELATION OF ITS CONTENTS TO OR RECEIPT BY AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. THE REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

50X1

1. The K J Vorosilov Plant, under military supervision, produces various types of guns and mortars. The chief of production is Mr (fnu) Hajek, an engineer.
2. About eight thousand people are employed in the plant. Of this number about 60% are specialists and skilled labor and about 1200 are administrative and technical employees. Twelve Soviet specialists who live in Trencanske Teplice and come to the plant by car are also employed in the plant. Some of the specialists are soldiers, quartered in three buildings in Prejta. Only carefully screened workers and Communists are employed in this plant. The work is done in two shifts, 6 am to 2 pm and 2 pm to 10 pm. The plant management wanted to operate on three shifts but had to abandon the idea because of a lack of man power.
3. Raw material and semi-finished parts come from the Vitkovice Iron Works and coal comes from Ostrava. The entire plant is run on electricity which is supplied by the new hydro-electric plant which is shown on the map Trencin 4460 (See Enclosure (A)).
4. Most production and repair of weapons is done in an underground hall equipped with machine tools and electric elevators. All transportation of materials and finished products is by rail. Materials are stored on the premises.
5. A factory guard, armed with pistols and wearing khaki uniforms with red insignia, is posted at the main entrances and at entrances to the main production hall. There is also a workers' militia unit and a fire unit with a motor fire engine.
